

Logger, Release 4.0 User Manual

March 4, 2004
BT-UM-0039, Revision 0.1

Abstract

The TI Logger version 4.0 uses both tracing log messages and as a Protocol Monitor. The Logger records log messages generated by TI Bluetooth host controller and the Protocol Monitor displays the communication transactions between the connected devices.

1. Introduction

The TI Logger version 4.0 is used for both tracing log messages and as a protocol transactions monitor. The Logger records log messages generated by TI Bluetooth host controller and the Protocol Monitor displays the communication transactions between the connected devices.

1.1 Documents Reference

Reference	Description / Comments
BT-DS-0022	BRF6150 Product Preview, Rev 0.1
BT-SW-0026	BRF6150 Vendor Specific Commands
BT-UM-0040	Island Message Trace User Manual, Rev 0.1
BT-UM-0038	Logger Protocol Monitor User Manual, Rev 0.1
	Bluetooth Specification versions 1.1 and 1.2

1.2 Main Features

- User friendly intuitive interface
- Able to log traces with different importance levels
- Rich configuration options including color tagging

2. Installation

2.1 System Requirements

- PC running Pentium II (minimum requirement).
- Operating Systems Windows 2000, Windows XP.
- Serial COM port (RS232).

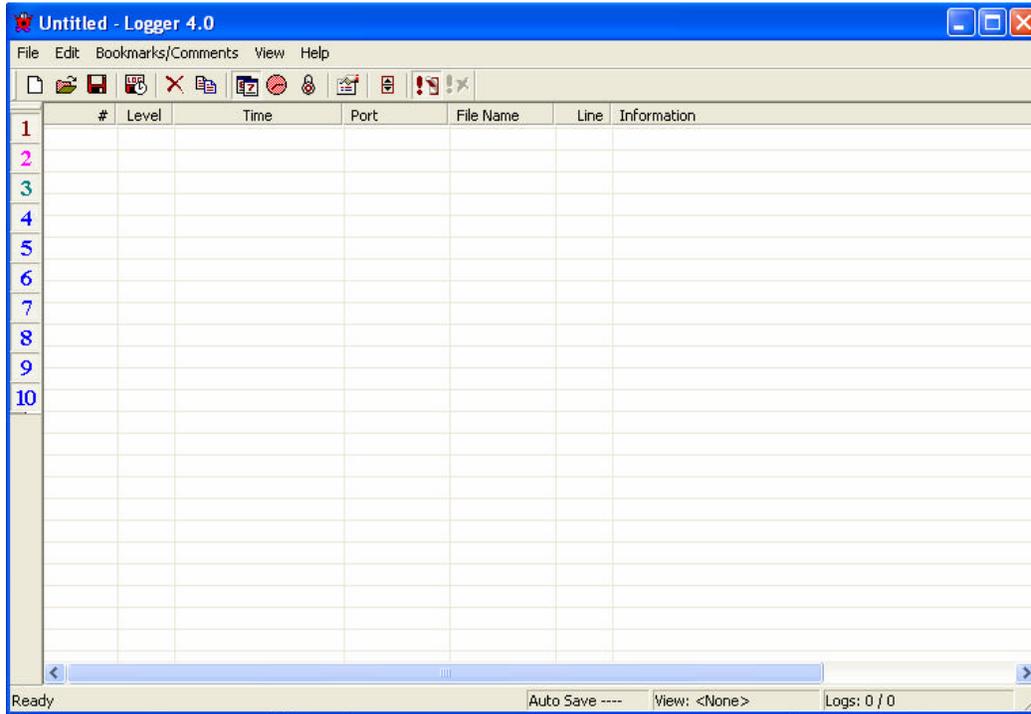

2.2 Installing the Logger

1. Whether from the installation CD or our website, please follow the instructions accompanying the Logger software program.
2. During the installation process, follow the on-screen prompts.
3. When installation is completed, the Texas Instrument Bluetooth Tools program group displays the Logger program icon.  |
4. Using an RS-232 cable, connect the PC to the TX_Debug port of the Bluetooth device.

3. Setup

3.1 Loading the Logger

Executes the logger application. The Logger window opens.

3.2 Logger Settings

From the Menu bar, click the View Menu and choose Settings.

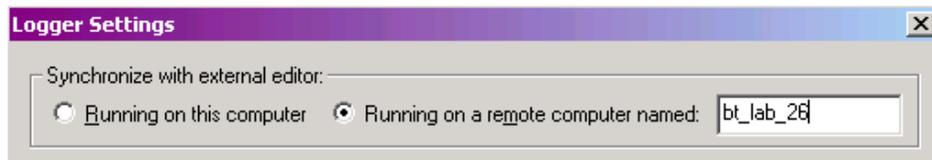

The Logger Settings window opens.

3.2.1 Synchronizing With External Editor

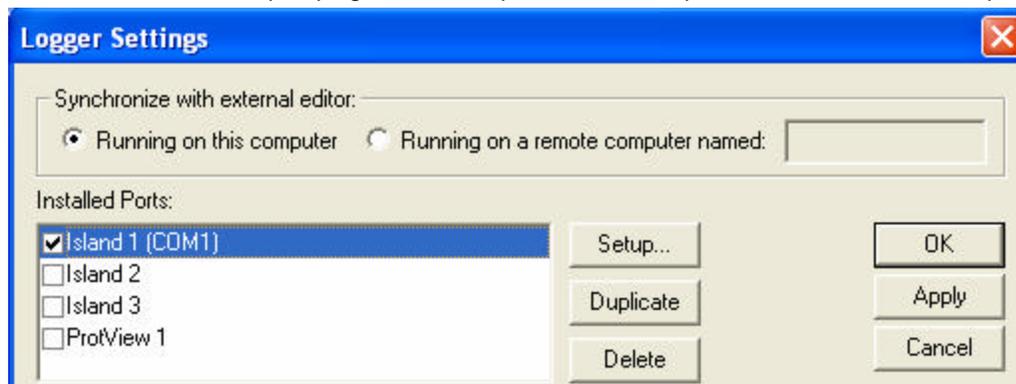

Logger is able to synchronize log events containing filename and line number with an external editor. Currently supported editor is Microsoft Visual Studio.

Specify on which computer the editor is installed and is running.

3.2.2 Port Selection and Setup

From the list of installed port plug-ins, select a port. In this example, we selected the Island1 plug-in.

Button	Description
Setup	Opens the setup window
Duplicate	Duplicates the selected port to create a new instance of that port (enables logging from different sources)
Delete	Deletes the selected port
Apply	Applies the changes without closing the window
Cancel	Discards the changes and closes the window
OK	Saves the new settings and closes the window

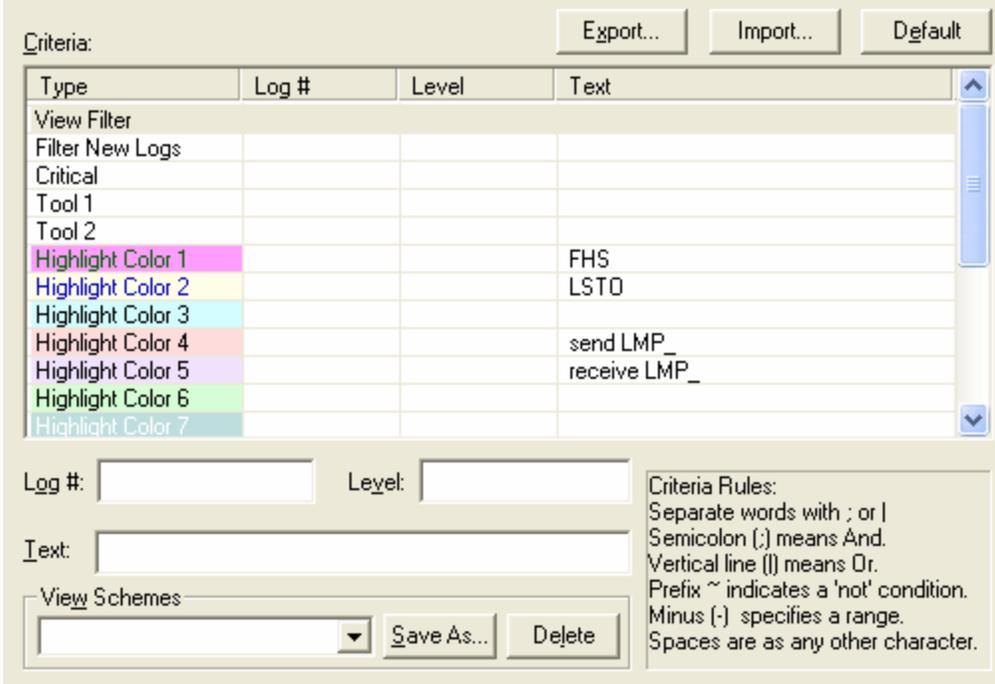

3.2.3 Criteria Settings Window

The criteria settings are used to differentiate between different logs. See section 3.2.4 **Editing a Criteria** on page 8. When setting a criterion first choose a criteria type, and then type values in the appropriate edit boxes.

Criteria Types

- View Filter** The Criteria Settings decide which logs are visible and which are hidden.
- Filter New Logs** Permanently deletes all new logs on arrival meeting the set criteria.
- Critical** Defines those logs that are deemed critical.
- Tool** Used to run any external file or application when the appropriate new log arrives.
- Highlight Color** Highlights any log meeting the set criteria with the selected color.

From the Menu bar, click **View** and then choose **Settings**.

Type	Log #	Level	Text
View Filter			
Filter New Logs			
Critical			
Tool 1			
Tool 2			
Highlight Color 1			FHS
Highlight Color 2			LSTO
Highlight Color 3			
Highlight Color 4			send LMP_
Highlight Color 5			receive LMP_
Highlight Color 6			
Highlight Color 7			

Log #: Level:

Text:

View Schemes: Save As... Delete

Criteria Rules:
 Separate words with ; or |
 Semicolon (;) means And.
 Vertical line (|) means Or.
 Prefix ~ indicates a 'not' condition.
 Minus (-) specifies a range.
 Spaces are as any other character.

Button	Description
Export...	Exports the current criteria settings to an external file
Import...	Imports a previously exported criteria file
Default	Clears all the criteria values for the currently selected type

3.2.4 Editing a Criteria

While selecting the requested criteria type, edit the following fields:

Editbox	Description
Log #	Selects the log number
Level	Selects the level
Text	For entering the criteria data

Criteria Rules

Each phrase is case insensitive.

Use the following operators to specify logical rules.

Operator	Description
;	And (separates phrases)
	Or (separates phrases)
~	NOT condition (tilde) placed at the beginning of any phrase to be excluded
-	Range (minus symbol) "From-To", "From-", "-To"
Space	Represents a space character (has the same properties as any other search string character)

3.2.5 Adding and Deleting Schemes

Multiple schemes can be created and later selected from the main screen. Here you can add new schemes or delete existing ones.

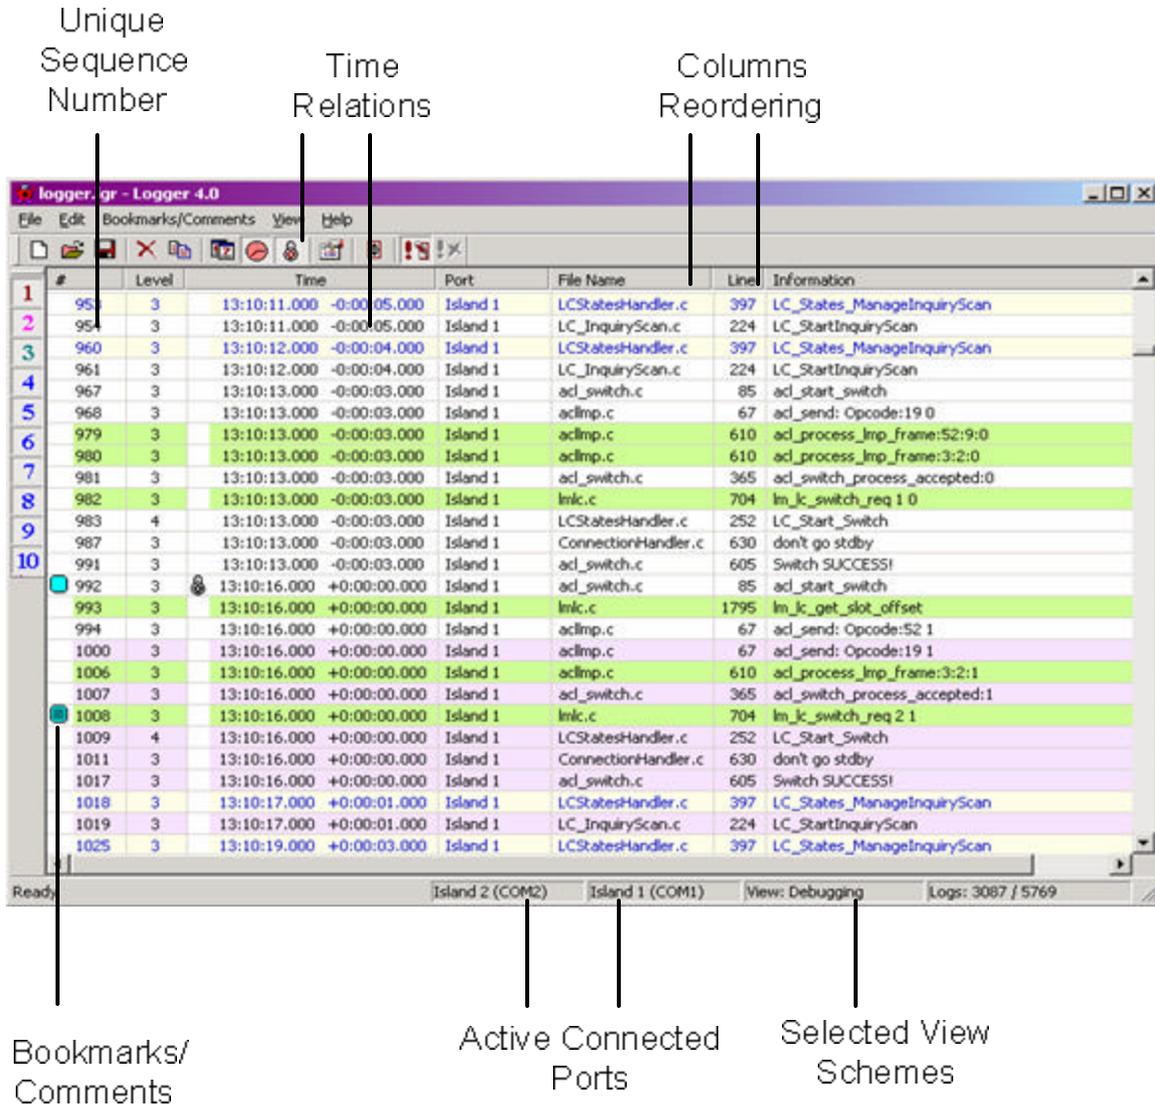

1. After creating a new View Scheme, click Save As...The Select View dialog box opens .

2. In the Name field, type a scheme name.
3. Click OK.

4. Using the Main Working Window Controls

The columns can be drag and dropped for arranging the column sequence.

The screenshot shows the Logger 4.0 main working window. The window title is "logger.gr - Logger 4.0". The menu bar includes "File", "Edit", "Bookmarks/Comments", "View", and "Help". The toolbar contains various icons for file operations and debugging. The main area is a table with the following columns: #, Level, Time, Time Relations, Port, File Name, Line, and Information. The table contains 25 rows of log data. The status bar at the bottom shows "Ready", "Island 2 (COM2)", "Island 1 (COM1)", "View: Debugging", and "Logs: 3087 / 5769".

Annotations with arrows point to the following controls:

- Unique Sequence Number:** Points to the "#" column header.
- Time Relations:** Points to the "Time Relations" column header.
- Columns Reordering:** Points to the "File Name" column header.
- Bookmarks/Comments:** Points to the "Bookmarks/Comments" menu item.
- Active Connected Ports:** Points to the "Island 2 (COM2)" and "Island 1 (COM1)" status indicators.
- Selected View Schemes:** Points to the "View: Debugging" status indicator.

#	Level	Time	Time Relations	Port	File Name	Line	Information
1	95	3	13:10:11.000 -0:00:05.000	Island 1	LCStatesHandler.c	397	LC_States_ManageInquiryScan

	1025	3	13:10:19.000 +0:00:03.000	Island 1	LCStatesHandler.c	397	LC_States_ManageInquiryScan

4.1 Log Levels

- Each log has a specific level and can be toggled on and off
- Using the right-click menu you can select all levels or deselect all levels
- Press the Ctrl key and click a level to select only that level ON

1 2 3 4 5 6 7 8 9 10

4.2 Toolbar

Icon	Description
	Opens new screen (Ctrl+N)
	Opens file (Ctrl+O)
	Saves screen (Ctrl+S)
	When the log reaches a predetermined size the logs are automatically saved and the log buffer is cleared.
	Deletes messages (DEL)
	Copies messages (Ctrl+C)
	Shows or hides the Date (toggles)
	Shows or hides the time (toggles)
	Shows or hides the relative time (toggles)
	Opens the Settings window
	Toggles automatic scrolling
	Audio beep on critical alarm (toggles)
	Mutes critical alarm

4.2.1 Status Bar

Island 1 (COM1) Auto Save ---- View: Colors Logs: 3780 / 3780

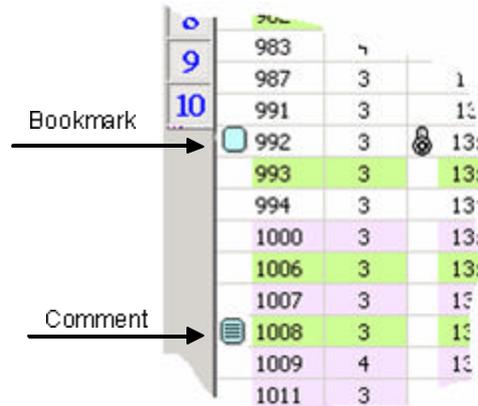

Name	Description
Island1 (COM1)	Currently selected port (Example only. This area can display different port names and connections)
Auto Save	Auto saves every predetermined time duration.
View	Currently selected view scheme. Clicking on this pane enables toggling between view schemes. Ctrl+Tab Switches to previous view schemes Ctrl+0..9 Switches to a specific view scheme
Logs: <Visible> / <Total>	Information of how many visible logs are currently displayed

4.2.2 Bookmarks and Comments

These commands are in the Bookmarks/Comments menu.

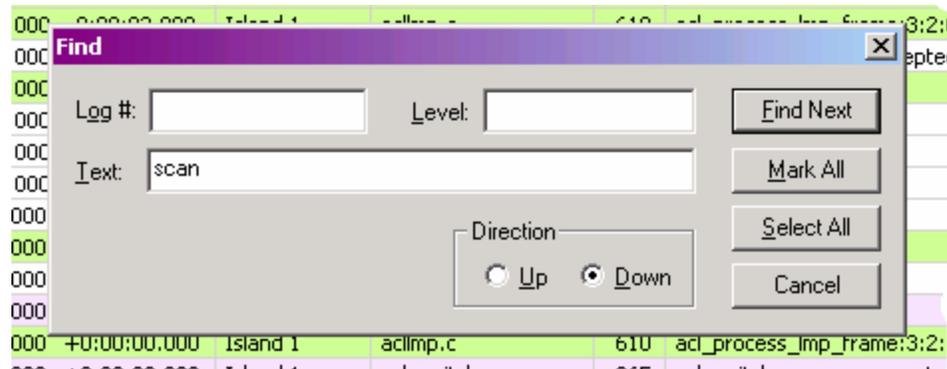

You can add or edit comments or toggle the bookmarks on and off using the right-click popup menu.

All comments and bookmarks are automatically saved when the logs are saved to file.

- F2 Next Bookmark
- Ctrl+F2 Toggle Bookmark
- Enter Edit Comment

4.2.3 Find Function

- Ctrl+F Find Dialog Box
- F3 Find Next
- 1..9 Find Next Level
- A..Z Incremental Search

5. Appendix A: Glossary

BD_ADDR	Bluetooth Device Address
BRF6100	TI Bluetooth single chip
BRF6150	Second generation TI Bluetooth single chip
BT	Bluetooth
HCI	Host Controller Interface
Host/Host PC	A PC connected to the device via the serial port
LMP	Link Manager Protocol
RF	Radio Frequency
SW	Software

Important Notice

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("Critical Applications"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, the customer to minimize inherent or procedural hazards must provide adequate design and operating safeguards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
