Important Notice

Texas Instruments Incorporated and/or its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products, software and services at any time and to discontinue any product, software or service without notice. Customers should obtain the latest relevant information during product design and before placing orders and should verify that such information is current and complete.

All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment. TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI products, software and/or services. To minimize the risks associated with customer products and applications, customers should provide adequate design, testing and operating safeguards.

Any access to and/or use of TI software described in this document is subject to Customers entering into formal license agreements and payment of associated license fees. TI software may solely be used and/or copied subject to and strictly in accordance with all the terms of such license agreements.

Customer acknowledges and agrees that TI products and/or software may be based on or implement industry recognized standards and that certain third parties may claim intellectual property rights therein. The supply of products and/or the licensing of software does not convey a license from TI to any third party intellectual property rights and TI expressly disclaims liability for infringement of third party intellectual property rights.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products, software or services are used.

Information published by TI regarding third-party products, software or services does not constitute a license from TI to use such products, software or services or a warranty, endorsement thereof or statement regarding their availability. Use of such information, products, software or services may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

No part of this document may be reproduced or transmitted in any form or by any means, electronically or mechanically, including photocopying and recording, for any purpose without the express written permission of TI.

Table of Contents

1.1	References	6
1.2	Abbreviations	9
1.3	Terms	11
2	Overview	12
3	Parameters	14
4	TEST CASES	20
4.1	Routing (internal)	20
4.1.1	BMIBLUE001: Setup the Routing and the PCO view for the MMI test	20
4.2	MMI Component Tests	22
4.2.1	BMIBLUE100: Power On Sequence	22
4.2.2	BMIBLUE101: request and confirm of initializing of profile headset(client)	26
4.2.3	BMIBLUE102: request and confirm of deinitializing of profile headset	27
4.2.4	BMIBLUE103: request and confirm of reconfiguration of profile headset	29
4.2.5	BMIBLUE104: search headset devices, found 3 headsets	30
4.2.6	BMIBLUE105: disconnect indication from remote network or device	32
4.2.7	BMIBLUE106: auto connection on for profile headset successfull	34
4.2.8	BMIBLUE108: transfer audio out request and confirm for headset	36
4.2.9	BMIBLUE109: transfer audio in request and confirm for headset	38
4.2.10	BMIBLUE110: connect request for profile headset	40
4.2.11	BMIBLUE111: disconnect request and confirm of profile headset	42
4.2.12	BMIBLUE112: set headset in default headset list	44
4.2.13	BMIBLUE113: delete preferred headset in default headset list	46
4.2.14	BMIBLUE114: get info about specific headset of default headset list	46
4.2.15	BMIBLUE115: set priority of specific headset of default headset list	48
4.2.16	BMIBLUE116: set headset parameter speaker gain	49
4.2.17	BMIBLUE117: save default headset list	50
4.2.18	BMIBLUE118: restore default headset list	52
4.2.19	BMIBLUE119: get config of profile headset	54
4.2.20	BMIBLUE120: save config of profile headset	56
4.2.21	BMIBLUE121: restore config of profile headset	58
4.2.22	BMIBLUE122: request and receive state of connection mode headset(client)	60
4.2.23	BMIBLUE123: request and confirm of initializing of profile headset(server)	61
4.2.24	BMIBLUE124: request and confirm of reconfiguration of profile headset (server)	63
4.2.25	BMIBLUE125: request and confirm of deinit of profile headset (server)	65
4.2.26	BMIBLUE126: connection indication from remote headset (gateway in server mode)	67
4.2.27	BMIBLUE201: request configuration profile dialup	69
4.2.28	BMIBLUE203: request reconfiguration of profile dialup	71
4.2.29	BMIBLUE202: request disable profile dialup	73
4.2.30	BMIBLUE204: search request for dialups	75
4.2.31	BMIBLUE205: disconnect request for dialup	77
4.2.32	BMIBLUE206: connect indication for dialup	79
4.2.33	BMIBLUE207: discon indication dialup	81
4.2.34	BMIBLUE208: call monitoring dialup	83
4.2.35	BMIBLUE300: request and receive services of devices	86
4.2.36	BMIBLUE301: request and confirm abort of searching procedure	88
4.2.37	BMIBLUE310: request pin	89
4.2.38	BMIBLUE311: send pin	91
4.2.39	BMIBLUE312: set pairable mode on	92
4.2.40	BMIBLUE313: set pairable mode off	93
4.2.41	BMIBLUE314: start and finish pairing procedure with remote device	94
4.2.42	BMIBLUE315: delete paired device from database	95

4.2.43	BMIBLUE316: check paired devices database	96
4.2.44	BMIBLUE317: pin confirmation	98
4.2.45	BMIBLUE318: pairing confirmation	100
4.2.46	BMIBLUE320: authorization request	102
4.2.47	BMIBLUE321: authorization reply	104
4.2.48	BMIBLUE322: get authorization mask of device	105
4.2.49	BMIBLUE323: set authorization mask	107
4.2.50	BMIBLUE326: set common security mode	109
4.2.51	BMIBLUE327: set default security level	110
4.2.52	BMIBLUE328: delete authorizations of device	112
4.2.53	BMIBLUE329: delete certain authorization	112
4.2.54	BMIBLUE401: delete list of found devices	114
4.2.55	BMIBLUE402: delete list of found headsets	114
4.2.56	BMIBLUE403: delete list of found dialups	115
4.2.57	BMIBLUE404: delete all list of found services	115
4.2.58	BMIBLUE405: give list of paired devices	120
4.2.59	BMIBLUE406: give list of authorization database devices	121
4.2.60	BMIBLUE407: list of devices for a authorized service	122
4.2.61	BMIBLUE408: delete list of found fax	123
4.2.62	BMIBLUE501: request configuration profile fax gateway	123
4.2.63	BMIBLUE502: request disable profile fax	125
4.2.64	BMIBLUE503: request reconfiguration profile fax	127
4.2.65	BMIBLUE504: search request for fax	129
4.2.66	BMIBLUE505: disconnect request for fax	131
4.2.67	BMIBLUE506: connect indication for fax	133
4.2.68	BMIBLUE507: discon indication fax	135
4.2.69	BMIBLUE508: call monitoring fax	137
4.2.70	BMIBLUE601: request and confirm of initializing of profile OPP(client)	140
4.2.71	BMIBLUE602: request and confirm of initializing of profile OPP(server)	142
4.2.72	BMIBLUE603: request and reconfiguration of profile OPP(server)	144
4.2.73	BMIBLUE604: request disable profile OPP (client)	146
4.2.74	BMIBLUE605: request disable profile OPP (server)	148
4.2.75	BMIBLUE606: put request from OPP server	150
4.2.76	BMIBLUE607: put response to OPP server and confirm from OPP server	152
4.2.77	BMIBLUE608: push request from OPP client for an object	152
4.2.78	BMIBLUE609: request from OPP client for pull an object from server	154
4.2.79	BMIBLUE610: exchange objects between OPP client and OPP server	156
4.2.80	BMIBLUE611: search service OPP	158
4.2.81	BMIBLUE612: delete list of found services OPP	160
4.2.82	BMIBLUE613: put confirm from OPP server	161
4.2.83	BMIBLUE614: push confirm from OPP client	163
4.2.84	BMIBLUE615: pull confirm from OPP client	165
4.2.85	BMIBLUE701: request and confirm of initializing of profile sync (server)	167
4.2.86	BMIBLUE702: request and confirm of reconfiguration of profile sync (server)	169
4.2.87	BMIBLUE703: search sync server with syn command support	171
4.2.88	BMIBLUE704: delete list of found sync server with syn command support	173
4.2.89	BMIBLUE705: request and confirm of deinitializing of profile sync server	174
4.2.90	BMIBLUE706: connection indication from sync client	176
4.2.91	BMIBLUE707: sync server sends syn command and indication information	178
4.2.92	BMIBLUE708: sync server sends authentication request	180
4.2.93	BMIBLUE709: sync server sends authentication response	182
4.2.94	BMIBLUE710: sync server terminates synchronization	184
4.2.95	BMIBLUE711: sync client requests to pull an object from sync server	186
4.2.96	BMIBLUE712: sync reply to pull requests an object from sync server	188
4.2.97	BMIBLUE713: sync client requests to push an object to sync server	190
4.2.98	BMIBLUE714: sync response to push request an object to sync server	192
4.2.99	BMIBLUE715: sync client confirm after push an object to sync server	194
4.2.100	BMIBLUE716: sync complete indication after send sync command	196
4.2.101	BMIBLUE717: deregistration security manager	198

4.2.102	BMIBLUE800: power down sequence	200

1.2 Abbreviations

AGCH	Access Grant Channel
BCCH	Broadcast Control Channel
BS	Base Station
BSIC	Base Station Identification Code
BTI	Bluetooth Interface

BTP	Bluetooth Protocol
CBCH	Cell Broadcast Channel
CBQ	Cell Bar Qualify
CC	Call Control
CCCH	Common Control Channel
CCD	Condat Coder Decoder
CKSN	Ciphering Key Sequence Number
C/R	Command / Response
C1	Path Loss Criterion
C2	Reselection Criterion
DCCH	Dedicated Control Channel
DISC	Disconnect Frame
DL	Data Link Layer
DM	Disconnected Mode Frame
EA	Extension Bit Address Field
EL	Extension Bit Length Field
EMMI	Electrical Man Machine Interface
F	Final Bit
FACCH	Fast Associated Control Channel
FHO	Forced Handover
GP	Guard Period
GSM	Global System for Mobile Communication
HPLMN	Home Public Land Mobile Network
I	Information Frame
IMEI	International Mobile Equipment Identity
IMSI	International Mobile Subscriber Identity
Kc	Authentication Key
L	Length Indicator
LAI	Location Area Information
LPD	Link Protocol Discriminator
M	More Data Bit
MCC	Mobile Country Code
MM	Mobility Management
MMI	Man Machine Interface
MNC	Mobile Network Code
MS	Mobile Station
NCC	National Colour Code
NECI	New Establishment Causes included
N(R)	Receive Number
N(S)	Send Number
OTD	Observed Time Difference
P	Poll Bit
PCH	Paging Channel
PDU	Protocol Description Unit
P/F	Poll / Final Bit
PL	Physical Layer
PLMN	Public Land Mobile Network
RACH	Random Access Channel
REJ	Reject Frame
RNR	Receive Not Ready Frame
RR	Radio Resource Management
RR	Receive Ready Frame
RTD	Real Time Difference
SABM	Set Asynchronous Balanced Mode
SACCH	Slow Associated Control Channel
SAP	Service Access Point
SAPI	Service Access Point Identifier
SDCCH	Slow Dedicated Control Channel
SIM	Subscriber Identity Module

SMS	Short Message Service
SMSCB	Short Message Service Cell Broadcast
SS	Supplementary Services
TCH	Traffic Channel
TCH/F	Traffic Channel Full Rate
TCH/H	Traffic Channel Half Rate
TDMA	Time Division Multiple Access
TMSI	Temporary Mobile Subscriber Identity
UA	Unnumbered Acknowledgement Frame
UI	Unnumbered Information Frame
VPLMN	Visiting Public Land Mobile Network
V(A)	Acknowledgement State Variable
V(R)	Receive State Variable
V(S)	Send State Variable

1.3 Terms

Entity:	Program which executes the functions of a layer
Message:	A message is a data unit which is transferred between the entities of the same layer (peer-to-peer) of the mobile and infrastructure side. Message is used as a synonym to protocol data unit (PDU). A message may contain several information elements.
Primitive:	A primitive is a data unit which is transferred between layers on one component (mobile station or infrastructure). The primitive has an operation code which identifies the primitive and its parameters.
Service Access Point	A Service Access Point is a data interface between two layers on one component (mobile station or infrastructure).

2 Overview

The Protocol Stacks are used to define the functionality of the GSM protocols for interfaces. The GSM specifications are normative when used to describe the functionality of interfaces, but the stacks and the subdivision of protocol layers does not imply or restrict any implementation.

The base of the Protocol Stack rests on the physical layer.

The Data Link Layer (DL) is used to handle an acknowledged connection between mobile and base station. The LAPDm protocol is used.

Radio Resource (RR) manages the resources of the air-interface. That means configuration of physical layer, cell selection and cell reselection, data transfer, RR-Connection handling.

Mobility Management (MM) handles registration aspects for the mobile station. It detects changes of location areas and updates a mobile station in the new location area.

Call Control (CC) provides the call functionality. This includes call establishment, call maintenance procedures like Hold, Retrieve or Modify, and call disconnection.

Supplementary Services (SS) handles all call independent supplementary services like call forwarding or call barring.

Short Message Services (SMS) is used for sending and receiving point-to-point short messages. Additionally the reception of cell broadcast short messages is included.

The man machine interface (MMI) is the interface to the user. Normally it is connected with a keypad as input device and a display as output device.

Between the several entities data interfaces are defined. These data interfaces are called Service Access Points (SAPs), indicating that an upper layer uses the services of a lower layer.

The GSM specification do not set out any implementation of the Protocol Stack. The following diagrams show the implementation described in all these documents for the mobile station. All entities except the Man Machine Interface and Physical Layer are implemented as part of the Protocol Stack.

Error! Objects cannot be created from editing field codes.

Figure 1: Mobile-station protocol architecture

This document describes the tests for the whole protocol stack using the MMI Framework.

3 Parameters

B. Glossary

International Mobile Telecommunication 2000 (IMT-2000/ITU-2000) Formerly referred to as FPLMTS (Future Public Land-Mobile Telephone System), this is the ITU's specification/family of standards for 3G. This initiative provides a global infrastructure through both satellite and terrestrial systems, for fixed and mobile phone users. The family of standards is a framework comprising a mix/blend of systems providing global roaming. <URL: <http://www.imt-2000.org/>>
