Important Notice

Texas Instruments Incorporated and/or its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products, software and services at any time and to discontinue any product, software or service without notice. Customers should obtain the latest relevant information during product design and before placing orders and should verify that such information is current and complete.

All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment. TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI products, software and/or services. To minimize the risks associated with customer products and applications, customers should provide adequate design, testing and operating safeguards.

Any access to and/or use of TI software described in this document is subject to Customers entering into formal license agreements and payment of associated license fees. TI software may solely be used and/or copied subject to and strictly in accordance with all the terms of such license agreements.

Customer acknowledges and agrees that TI products and/or software may be based on or implement industry recognized standards and that certain third parties may claim intellectual property rights therein. The supply of products and/or the licensing of software does not convey a license from TI to any third party intellectual property rights and TI expressly disclaims liability for infringement of third party intellectual property rights.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products, software or services are used.

Information published by TI regarding third-party products, software or services does not constitute a license from TI to use such products, software or services or a warranty, endorsement thereof or statement regarding their availability. Use of such information, products, software or services may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

No part of this document may be reproduced or transmitted in any form or by any means, electronically or mechanically, including photocopying and recording, for any purpose without the express written permission of TI.

1.2 Abbreviations

ACI	Application Control Interface (AT Commands)
AL	Application Layer
APDU	Application Protocol Data Unit
CBCH	Common Broadcast Channel
CPS	Cambridge Positioning System
DTAP	Direct Transfer Application Part
E-OTD	Enhanced Observed Time Difference positioning method
LCS	Location Services
LC	Location Service handling Entity
LR	Location Request

NA-ESRD	North American Emergency Services Routing Digits
NA-ESRK	North American Emergency Services Routing Key
PS	Protocol Stack
RRLP	Radio Resource Location Service Protocol
SMLC	Serving Mobile Location Center

1.3 Terms

Entity:	Program which executes the functions of a layer
Message:	A message is a data unit which is transferred between the entities of the same layer (peer-to-peer) of the mobile and infrastructure side. Message is used as a synonym to protocol data unit (PDU). A message may contain several information elements.
Primitive:	A primitive is a data unit which is transferred between layers on one component (mobile station or infrastructure). The primitive has an operation code which identifies the primitive and its parameters.
Service Access Point:	A Service Access Point is a data interface between two layers on one component (mobile station or infrastructure).

2 Overview

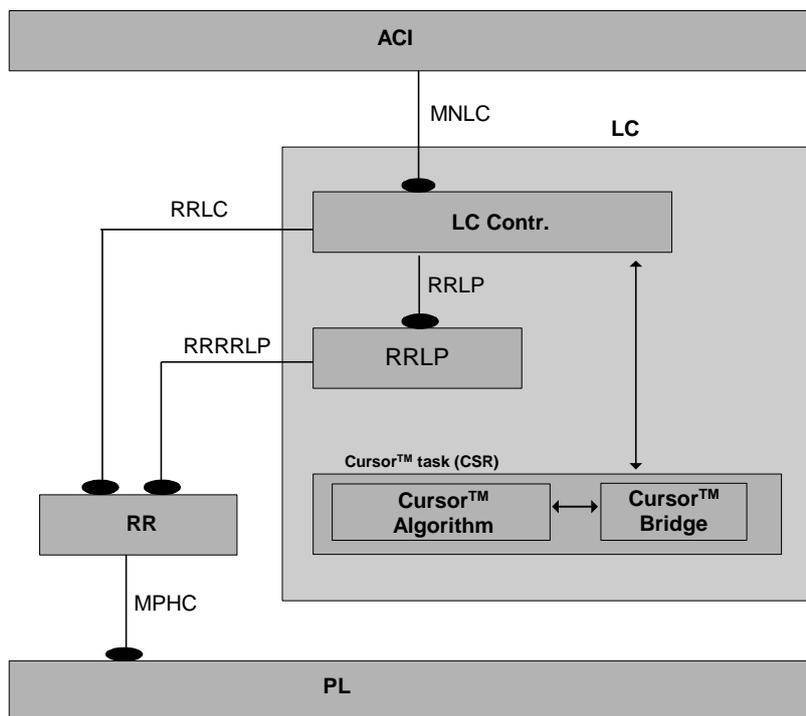

Figure 1: LC details

Figure 1 shows the details of the Cursor™ task as provided by CPS. It consists of two parts, the Cursor™ Algorithm and the Cursor™ Bridge code. To have a more generic approach for further developments, the LC controller co-ordinates the positioning requests to the appropriate implementation, e.g. E-OTD or GPS. Texas Instruments will develop the LC controller and the RRLP. The Cursor™ Bridge code is available in source code, representing

the interface between the LC controller and the Cursor™ Algorithm. It is used to exemplify the data handling between the modules but can be adapted to the Texas Instruments needs. The Cursor™ Algorithm module is provided in object code, receiving the correlation data and BTS identifier and calculates precise OTD values. The Cursor™ Algorithm remains property of CPS and will not be part of the Protocol Stack software release. The data handling is taking place inside RRLP or ACI (only during test phase 1 & 2 or for further implementations of assistance data). All point-to-point data, e.g. assistance data from the network and the location response from the MS, are handled by RRLP. General positioning data, e.g. assistance data to all mobiles in a cell, might be distributed via CBCH and is then transported via ACI to the LC. The interface between LC controller and RRLP is primitive based with functional character in order to run RRLP in another task context, e.g. RR.

(4) RRLP_ERROR_REQ	cause	RRLC_ERROR_REQ_CAUSE_2

History:23.09.02 MNC Initial

4.2.9 LC010: EOTD-Controller1: Position calculation

Description: LC receive a MNLC_SMS_SMS_REQ and ask RR for new position data (RRLC_MEAS_REQ) LC receive new position data (RRLC_MEAS_IND) and send them to the algorithm. When the LC receive the calculated data from the algorithm it send the data to MMI in the MNLC_SMS_MEAS_CNF.

Preamble: LC000

Parametrization

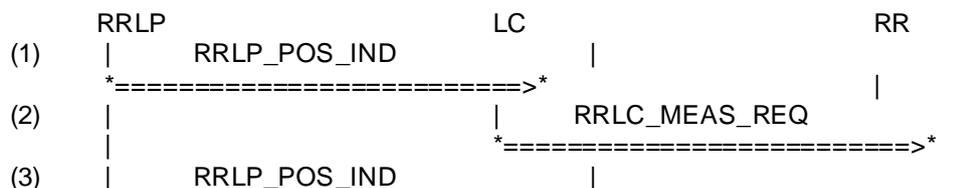

Primitive	Parameter	Value
(1) MNLC_SMS_MEAS_REQ	reference	CALL_REF
	called_party_bcd_num	BCD_NUMBER
(2) RRLC_MEAS_REQ	req_id	REQ_ID
	arfcn	NOT_USED
	bsic	NOT_USED
	assist_data	NOT_USED
(3) RRLC_ERROR_IND	cause	RRLC_ERROR_REQ_CAUSE_2
(4) MNLC_SMS_MEAS_CNF	reference	NOT_USED
	data_valid	DATA_VALID1
	sms_text	NOT_USED

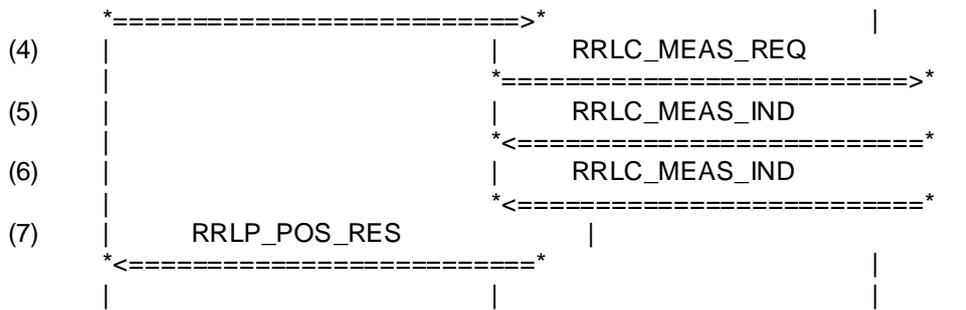

History: 23.09.02 MNC Initial

4.2.10 LC011: EOTD-Controller1: RRLP request no measurement data

Description: LC receive a RRLP_POS_IND and ask RR for new position data (RRLC_MEAS_REQ) LC receive new position data (RRLC_MEAS_IND) and send them to the algorithm. When the LC receive the calculated data from the algorithm it send the data to RRLP in the RRLP_POS_RES.

Preamble: LC001

Parametrization

Primitive	Parameter	Value
(1) RRLP_POS_IND	assist_data	ASSIST_DATA
	loc_method	LOC_MET
	pos_method	POS_MET
	arfcn	ARFCN
	bsic	BSIC
(2) RRLC_MEAS_REQ	req_id	REQ_ID
	arfcn	NOT_USED
	bsic	NOT_USED
	assist_data	NOT_USED
(3) RRLP_POS_IND	assist_data	ASSIST_DATA
	loc_method	LOC_MET
	pos_method	POS_MET
	arfcn	ARFCN
	bsic	BSIC
(4) RRLC_MEAS_REQ	req_id	REQ_id
	arfcn	NOT_USED
	bsic	NOT_USED
	assist_data	NOT_USED
(5)	RRLC_MEAS_IND	
	mcc	MCC
	mnc	MNC
	lac	LAC
	cell_id	CELL_ID
	eotd_mode	NOT_USED
	req_id	REQ_ID
	tav	TAV
	fn	FN
	eotd_sc_res	EOTD_SC_RES
	eotd_sc_res1	EOTD_SC_RES1
eotd_nc_res	EOTD_NC_RES	

(6)	RRLC_MEAS_IND	
	mcc	MCC
	mnc	MNC
	lac	LAC
	cell_id	CELL_ID
	eotd_mode	NOT_USED
	req_id	REQ_id
	tav	TAV
	fn	FN
	eotd_sc_res	EOTD_SC_RES
	eotd_sc_res1	EOTD_SC_RES1
	eotd_nc_res	EOTD_NC_RES

(7) RRLP_POS_RES	timing_data	NOT_USED

B. Glossary

International Mobile Telecommunication 2000 (IMT-2000/ITU-2000) Formerly referred to as FPLMTS (Future Public Land-Mobile Telephone System), this is the ITU's specification/family of standards for 3G. This initiative provides a global infrastructure through both satellite and terrestrial systems, for fixed and mobile phone users. The family of standards is a framework comprising a mix/blend of systems providing global roaming. <URL: <http://www.imt-2000.org/>>
